

4th September 2008

Dear Parent,

The policy of the Maths department in Newpark is as follows.

All first year students follow the same Mathematics syllabus. Throughout the year the students sit common tests and at the end of the school year there is a common summer examination.

Class groups for second year are formed on the basis of these tests and examination. Two of the groups will be following the higher level syllabus. Therefore students who wish to do the higher level in second year will need to perform consistently well in the class tests during the year in order to earn their place in a Higher Level class in second year.

Yours sincerely

Alan Roddie  
Co-ordinator of Mathematics

Derek Lowry  
Principal
